

## EQUIPMENT LIST IN CANADIAN CURRENCY

FULLY EQUIPPED CRASH CART**\$ 20,000**

With all acute care emergency equipment, including defibrillator and pulse oximeter.

To rush emergency aid in critical care situations.

HEART MONITORS**\$ 16,000**

Attached to the critical care patient, this machine keeps moment-to-moment track of all essential heart functions and alerts doctors and nurses to any sudden change in vital heart functioning, especially during weaning from respirators.

DEFIBRILLATORS**\$ 13,500**

Electric-shock, life-saving apparatus for victims of heart attacks.

Used for patients in intensive care.

STANDARD ELECTRO-CARDIOGRAPHS (ECG)**\$ 8,000**

A regular "workhorse" for day-to-day use in heart examination.

MOBILE VITAL SIGNS MONITOR – SIX required**\$ 5,000**

Measures blood pressure (non-invasive), oxygen saturation, pulse rate and body temperature. Used for very ill patients who are not in intensive care.

PULSE OXIMETERS – TWENTY required**\$ 2,500**

Important diagnostic device for patients with breathing and circulatory problems.

It measures the amount of oxygen in the blood.

MONITOR FOR GENERAL PARAMETER**\$ 3,600**

Measures the cardiac rhythm and amount of oxygen and temperature in the blood continuously

FOOD PUMPS ("Kangaroo")**\$ 1,500**

To control flow of nutrients through infusion

**CUSTOM DESIGNED CHILDREN'S BEDS WITH  
SPECIAL MATTRESS** - 30 required

**\$ 8,000**

For the children in the Children's Chronic Respiratory  
Care Department.

**STATE-OF-THE-ART ADULT BEDS** – 200 required

**\$ 8,000**

For rehabilitation and acute care patients, with attachments for  
respirator apparatus, oxygen  
generators and other vital life-saving devices

**SPECIAL MATTRESSES** – SIXTY required

**\$ 2,000**

Used for acute care and other patients requiring special care  
who are at high risk of  
developing pressure sores

RESPIRATORS FOR ADULTS – TWENTY FIVE required  
**\$ 37,000**

Used to support patients who are unable to breathe on their own

RESPIRATORS FOR CHILDREN – TEN required  
**\$ 30,000**

Used to support children who are unable to breathe on their own.

CO2 LEVEL METER (Capnograph)  
**\$ 5,000**

Device to measure Carbon Dioxide level of patients on respirators, so as to make sure that the ventilation is effective.

SPECIAL NEEDS WHEELCHAIRS FOR CHILDREN  
**\$ 6,600**

Tailor made for each child on a respirator, designed specifically to meet the needs of each child as they grow.

### SPECIAL NEEDS WHEELCHAIR

**\$ 4,000**

For patients with special needs such as in Physical Rehabilitation and Complex Nursing Departments.

### HOIST FOR LIFTING PATIENTS

**\$ 8,250**

Crane to lift disabled patients from bed to chair

### SCALE FOR HOIST

**\$ 5,000**

To weight patients in their beds. This is most important as many patients cannot get out of their beds.

### WHEELCHAIR SCALE (foldable ramp)

**\$ 3,500**

Enables staff to weigh a patient who is in a wheelchair and cannot stand

## PATIENTS' CHAIRS

**\$1,000**

Reclining chairs for patients to sit on, so that they are not always in bed

## GUEST CHAIRS

**\$ 175**

100 needed to be distributed in all Hospital departments

## DINING ROOM TABLES

**\$ 850**

For patients to enjoy their meals

## FLOOR CLEANING MACHINES

**\$ 5,000**

## COMMERCIAL DISHWASHER

**\$ 6,600**

## HEATING FOOD CARTS

**\$ 50,000**

Enables food to be served hot to patients in the departments
